

Nasdaq 15:30pm Strategy

FACTS ABOUT NASDAQ INDICE

What Is Nasdaq?

The Nasdaq Stock Market is an American stock exchange. It is the second-largest exchange in the world by market capitalization, It is a broad-based index including more than 3,000 companies, many of which are in the high-tech industry.

Market Cap

*\$10 Trillion

Number Of Listings

*3 321 (Carrying Approximately 1.8 Billion Trades Per Day)

Why Is Nasdaq Important?

NASDAQ has a very important role to play in global as well as local economy. In the U.S. alone, it is the single most trusted ground for any company to list its shares on. All major global conglomerates have their stocks listed on NASDAQ.

What Causes Stock Price Change?

By this we mean that share prices change because of **supply and demand**. If more people want to buy a stock (demand) than sell it (supply), then the price moves up. Conversely, if more people wanted to sell a stock than buy it, there would be greater supply than demand, and the price would fall.

What Makes A Stock Price To Go Up And Down?

If there is a greater number of buyers than sellers (more demand), the buyers bid up the prices of the stocks to entice sellers to get rid of them. Conversely, a larger number of sellers bids down the price of stocks hoping to entice buyers to purchase.

We Are Done With The First Part.....

Strategy Requirements.....

You Must Have A Slight Background Knowledge Of The Following 4 Aspects.

**SUPPORT AND RESISTANCE*

**SUPPLY AND DEMAND*

**Breakouts And Retest*

**NEW YORK SESSION OPENING TIME*

-Support And Resistance

Is a concept that the movement of the price of a asset will tend to stop and reverse at certain established price levels. These levels are indicated by multiple touches of price without a breakthrough of the level.

-Supply And Demand

Supply and demand trading is a trading method where the idea is to find points in the market where the price has made a strong advance or decline

Rules Of Trading The Strategy

In General , Most Traders/Investors Believes In Support And Resistance , Without Fear I Can Say It Really Does Works , But With Nasdaq I Have Discovered That 85% Of The Times Support And Resistance Are Totally/Strongly Violated During The NY Session Opening.

Trading Support And Resistance On Nasdaq

Firstly You Need To Precisely Observe And Identify The Strongest Support Or A Resistance Zone On H1 And H4 Timeframe , Once You,ve Done That , Mark Them With Your

Horizontal Lines , Bear In Mind , You're Required To Market The Zones As Follows.

-First Trend line Should Be From A Body To A Wick , And A Second Trend line From A Wick To A Body , Hope You Get It.

Rule Number 1(Resistance)

-When The Market Approaches Your Resistance And The Time Is 15:28pm For Instance , You Need To Wait For The Green(Bull)Candle To Touch Your Resistance First Then Execute A "BUY" Position At 15:30pm , You Do Not Take A Trade When The Last Candle Before 15:30pm Was A Red(Bearish)Candle.

Rule Number 2(Support)

-When The Market Approaches Your Support Zone And The Time Is 15:28pm For Instance , You Need To Wait For The Red(Bearish) Candle To Touch Your Support First Then Execute A "SELL" Position At 15:30pm , You Do Not Take A Trade When The Last Candle Before 15:30pm Was A Green(Bullish)Candle.

~~We're Totally Against Support And Resistance Principle On This Strategy.~~

Trading Supply And Demand Nasdaq

In My Experience, I Have Witness Supp And Demand Doing Wonders In All The Markets , Either Stocks , Currencies Or Futures , You Must Remember , What Creates The Market It's The Human/Traders psychology.

Rule Number 1(Supply)

*When The Market Approaches This crucial Zone , It Tends To Grow Attention On Investors As It's A Zone With **A HUGE** Volume Of Sellers . So Immediately The Market Touches Your Supply Zone , You Execute A "SELL" POSITION" Asking No*

Questions 🙋 As This Is A Very Reliable And Mostly Traded Zone On The Market.

Rule Number 2(Demand)

When The Market Approaches This crucial Zone , It Tends To Grow Attention On Investors As It's A Zone With **A HUGE** Volume Of Buyers . So Immediately The Market Touches Your Demand Zone , You Execute A “BUY” POSITION” Asking No Questions 🙋 As This Is A Very Reliable And Mostly Traded Zone On The Market.

Trading Breakout And Retest

With This Strategy , You'll Only Trade Breakouts And Retest Of Either Supply Or Demand Zone , You Do Not Apply This On Support And Resistance As They Are Not Much Reliable On Stocks.

Hope You Enjoy Reading The Strategy , Kindly Drop A Feedback Once You,ve Tested It. Kindly Make Sure You Apply And Follow All The Rules.

Good luck!!
